## OPEN TO WORK - JUNIOR WEB DEVELOPER

I am a tech enthusiast with a thirst for knowledge in programming, looking for an opportunity to start my career as a junior web developer. With a proactive approach and a passion for problem solving, I am eager to share my creativity and technical skills to contribute to the development of high-quality web solutions. With a bachelor's degree in applied electronics and a developer of small projects in the Javascript programming language, I am ready to learn quickly and develop in a dynamic and collaborative work environment. I am excited about the challenges that the IT industry offers and look forward to contributing to your team.
